How to run the software

Prerequisites

1. Node version: 16.14.2

Running the parse server

```
cd parse-server-migration

npm install

npm i -g mongodb-runner

npm run build

npm run dev:db-start

npm run start
```

Running the Moralis + Next app

```
cd nomads-connect-main

npm install

npm run build

npm run start
```

Running Sanity

```
cd nomads-connect-main/studio

npm i

npm i -g @sanity/cli

sanity start
```

Check if everything is working
